

# Salvaje Adaptable Accessible Clothing

**A line of jackets and other clothing designed for people with limited mobility and people in wheelchairs to allow them to put on and take off their outer layers with more ease.**

**Mouse** is a national youth development nonprofit that believes in technology as a force for good.

We empower all students to create with technology to solve real problems and make meaningful change in our world.

**mouse.org**

Our Design League is an elite team of tinkerers and innovators that creates new projects to address a social need. Over the course of the program, students brainstorm, prototype, and present their Legacy Projects, while developing technological skills and exploring career pathways with technology mentors across diverse professional settings.

## Electra-Wallet

**A device designed to help those with limited motor skills to easily access their credit cards, metro cards, and more without having to manipulate zippers or buttons or card slots.**

## Locus

**A wearable attachment designed to increase the freedom and independence of people, especially those with communication limitations and non-verbal disabilities to help family, teachers, or personal aids find their location via GPS and SMS texting.**

## Omni-Joy

**An accessible, portable game controller designed to make playing games more fun and social for all users, and more usable for people with limited mobility.**

**Come see our Mouse Design League prototyping their assistive and adaptive technology projects on every Tuesday from 4:30 to 6:00pm**

**Contact Janine Quijje at [janine@mouse.org](mailto:janine@mouse.org) to schedule a visit!**
